Brad,

Attached are revised work plans for evaluation of partial excavation alternatives and the alternative Area 2 RIM depth and volume. The work plans have been revised to reflect that the additional SFS evaluations will be based on the results of the additional investigations being performed at the site (e.g., Phase 1, Phase 1D and the Additional Characterization of Areas 1 and 2) as well as EPA's requirement that three partial excavation alternatives be developed and evaluated as part of the additional SFS evaluations.

Please let us know if you have any questions or would like to discuss these work plans or any other aspect of the OU-1 work.

Thank-you, Paul
